

# Little Fingers®

Hands come in different sizes. Now, so do keyboards!

// LittleFingers® provides students with a keyboard that allows children to easily reach keys that are spaced for touch typing without stretching. //

—Kathleen Schrock  
Technology Coordinator at Dennis-Yarmouth Regional School

The first keyboard  
ergonomically designed  
for kids' hands!

LF-2500 MAC® USB version

1. Small footprint—  
just 12.5"

2. Key caps specially sized and  
spaced for children's hands

3. Dual-purpose keys provide  
extended functionality

4. 3-button trackball  
ideal for kids

5. Color-coding for  
frequently used keys

6. Built-in wrist rest  
for maximum comfort

7. Upper and lower case  
letters on key caps

PC & Macintosh® compatible!

# LittleFingers®

Small hands have a hard time with a full-size keyboard. Even the shortest fingers can easily make the stretch to tough-to-reach keys. //  
—Educational News

LittleFingers keyboard will give your child a jump start on touch typing. //  
—Parents.com

LittleFingers is not a toy—it is technically superior to any of the so-called plastic “kiddy” keyboards on the market. //  
—PC Magazine

## Features

- Key caps sized and spaced for kids' keyboarding
- Small footprint—just 12.5"
- Function keys are user-definable
- Dual-purpose keys provide extended functionality
- 3-button Trackball puts all functions in easy reach
- Numeric Keypad version also available (replaces Trackball)

## Layout

- QWERTY— both upper and lower case letters on key caps (U.S.)

## Size

- L: 12.5" W: 7.25" H: 1.25"

## Models—Configuration/Connection

- LF 2000—Trackball w/ PS2/ADB PC or Mac®
- LF 2100—NumberPad w/ PS2/ADB PC or Mac
- LF 2500—Trackball w/ USB for Mac
- LF 2600—NumberPad w/ USB for Mac
- LF 2700—Trackball w/ USB for PC
- LF 2800—NumberPad w/ USB for PC

## System Requirements

- Mac and Windows® compatible
- Mac OS X compatible

## Warranty

Limited lifetime to original purchaser.

## The best way to help kids learn computing!

### Size does make a difference!

Because hands come in different sizes—so should keyboards! Our new, patented\* LittleFingers is the first keyboard sized to fit the hands of children.

### The ergonomic advantage

Using LittleFingers, children become comfortable with computing faster. And keyboarding—one of the most important and lasting computer skills—comes easily because LittleFingers is the first keyboard with keys scientifically-sized and spaced for a kid's reach. No more “hunting-and-pecking” on a keyboard built for adult-sized hands!

### The only keyboard kids will ever need

LittleFingers is a full-function keyboard with a rugged, built-in Trackball that eliminates the need for a separate mouse. This unique design lets kids type, point and click without removing their hands from the keyboard. A Numeric Keypad version is available for those who prefer to use a mouse instead of a Trackball. Also, because LittleFingers works on both Mac® computers and PCs, it doesn't matter what computer system you have—now or in the future.

### Works side-by-side with an adult-sized keyboard

Just plug the LittleFingers connector into a second port, and an adult can work with a child simultaneously. Now parents or teachers can work with their kids, teaching, assisting, or in joint computer activities.

Size matters!

Numeric Keypad version also available
