

KENSINGTON®

Expert Mouse® 5.0

Turbo Mouse® 5.0

Award-winning
Trackballs

Put your hand on an Expert Mouse or Turbo Mouse 5.0 and you'll feel why Kensington is the leader in innovative trackball design.

These unique four-button trackballs not only deliver higher performance and convenience, they do it more comfortably.

More comfort for your hand.

The symmetrical design fits the shape of any hand—left or right, large fingers or small.

Extra-large buttons are specially designed with ridges to guide your fingers without looking. And the larger ball makes it easier to move and control the cursor.

More power at your fingertips.

You not only click more comfortably, you click less often. Kensington's MouseWorks™ software makes computing easier by placing more of your computer's time-saving capabilities at your immediate command.

Glide through your work—substituting tedious and time-consuming tasks such as double-clicking or dragging with a single click.

Create the perfect trackball for you.

With Kensington's unique pop-up menus, you can create your own menu of shortcuts personalized for the tasks you perform most often. Click once to bring up the menus. Click again, and the task is done.

You can create different menus for each application you use, or select from pre-defined pop-up menus. From Microsoft Word and Netscape Navigator™ to the popular game Marathon, Kensington offers short-cuts for a variety of programs.

You'll quickly see why Kensington's easy-to-use pop-up menus are the ultimate time-saver.

From the trackball leader.

To date, Kensington input devices have won more than 20 industry awards because of our commitment to combining the best hardware with the most up-to-date software.

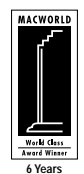

Now, with a new 4-button design and high-performance software, the best just got better.

MouseWorks Software

- 1 **No more double-clicking.**
Now you can open files, directories and applications with one easy click. This feature means you'll never double-click again!
- 2 **If you can type it.**
One click can print and save a document, or insert a block of text. Anything you can type on the keyboard, MouseWorks can do with just one easy click.
- 3 **How slow can you go?**
Temporarily slow down the cursor for pixel-by-pixel control. Makes detailed work easier and less tiring.
- 4 **Dragging no longer a drag.**
The hardest mouse action is now the easiest. Drag, scroll or highlight without having to hold down the mouse button.
- 5 **Right on the button.**
When a dialog box appears, you want the cursor on the default button. Our Snap to Default feature moves the cursor there automatically.

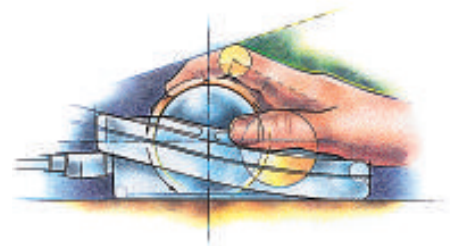

Product Specifications and Warranty Information.

- 6 **Personalized pop-up menus.**
It's like magic. Personalized pop-up menus simplify the tasks you use most often. Use the pre-defined pop-up menus for your favorite applications or create your own.

Advanced Hardware

- Four buttons.** Extra buttons to do what you want, like double click.
- Comfortable button layout.** Extra-large for easier clicking, with gentle ridges that guide your fingers to the buttons.
- Efficient, effort-saving trackball design.** Less hand and arm movement, less desk space.
- Symmetrical shape.** Perfect for both left- and right-handed use.
- Large ball.** More comfortable, easier to control for both adults and children.
- Stainless steel bearings.** Simply the highest quality and smoothest movement of any trackball.
- Optical technology.** Fewer moving parts, so it lasts longer. Our warranty proves it.
